BHARAT STARS SERVICES  
PRIVATE LIMITED

08.01.2015

The Secretary  
Airports Economic Regulatory Authority of India  
AERA Building,  
Administrative Complex  
Safdarjung Airport  
NEW DELHI — 110 003

Dear Sir

Subject: Submission of Multi Year Tariff Proposal for determination of Tariff for Into Plane Service Fee by Bharat Stars Services Private Limited — ITP Service Provider at Chhatrapati Shivaji International Airport (CSIA) Mumbai.

Bharat Stars Services Private Limited (BSSPL) has been awarded the Into-Plane Tender award by Mumbai Aviation Fuel Farm Facilities Private limited (MAFFFL), a Joint venture company of MIAL and the Oil PSUs — Indian Oil Corporation Limited (IOCL), Bharat Petroleum Corporation Limited (BPCL) and Hindustan Petroleum Corporation Limited (HPCL) vide letter ref MAFFFL/ITP/BSSPL/01 dated 29.10.2014 (Copy of Award Letter enclosed).

After the privatisation of Airport, the Open Access System concept is introduced and the entire Aviation Fuel Supply has now been segmented into:

- a) Aviation Fuel Supplies by Fuel Suppliers
- b) Hydrant Infrastructure Services
- c) Into-Plane Services

Therefore, Into Plane Service which was earlier done by the Fuel Suppliers at CSI Airport, Mumbai will now be provided by two Into Plane Agents based on the competitive bidding. The Into-Plane service fee has been arrived by the Airport Operator after the competitive bidding process wherein two parties including Bharat Stars Services Pvt. Ltd. has been selected by the Airport Operator i.e. MAFFFL.

We are pleased to submit, our Multi Year Tariff Proposal in accordance to AERA (Terms and Conditions for Determination of Tariff for Services Provided for Cargo Facility, Ground Handling and Supply of Fuel to the Aircraft) Guidelines, 2011:

- 1. Form (A)
- 2. Executive Summary
- 3. Various Forms as per AERA Guidelines
- 4. User Agreements –
  - a) Copy of Sub Concession Agreement with MAFFFL
  - b) Copy of Into Plane Agent Agreements with Supplier.

कॉर्पोरेट ऑफिस : प्लॉट ए-5 एवं 6, सेक्टर-1, नोएडा - 201 301, भारत फोन : +91 120 2474154 / 4415 www.bsspl.in  
Corporate Office : 1st Floor, Plot A-5 & 6, Sector-1, Noida - 201 301, India Phone: +91 120 2474154 / 4415 www.bsspl.in

रजिस्टर्ड ऑफिस : बी पी सी एल एविएशन फ्यूलिंग स्टेशन, इंदिरा गाँधी इन्टरनेशनल एयरपोर्ट टर्मिनल II, न्यू दिल्ली - 110061  
Registered Office : BPCL Aviation Fuelling Stn., Indira Gandhi International Airport Terminal II, New Delhi - 110061

CIN: U11100DL2007PTC168158

0000134

BSSPL is seeking the approval of tariff under "Light Touch Regulation" because as per AERA Guidelines, we meet the following criteria:

**1. Materiality Assessment (Clause 4.2)**

The Materiality Index is more than 5 % (Fuel throughput in KL at Mumbai Airport / Total Fuel Throughput in KL at major Airports x 100 i.e. 1492000 KL / 50000000 KL x 100 = 29.84 %)

**2. Competitive Assessment (Clause 5)**

Two Into-plane Service providers viz. ourselves and IndianOil Skytanking Ltd have been appointed by MAFFFL through a competitive bidding process by way of a Public Tender. Since this Regulated Service at CSI Airport Mumbai shall be provided by two service providers, it may be considered as "Competitive" at this airport.

**3. User Agreement (Clause 6)**

BSSPL has entered into an agreement with MAFFFL and also with the suppliers whereby rates and other terms and conditions on which ITP services would be provided are mentioned. These agreements are entered for a period of ten years with an annual escalation as per tender conditions.

From the above, it is clear that we meet the conditions prescribed under the AERA Guidelines for the category of "Material but Competitive".

**Confidentiality of the documents submitted:**

The information provided in the MYTP Formats and other forms is confidential business information for your perusal and it is requested that same is not to be put in the public domain for protecting our business interest and maintaining appropriate confidentiality. We are also required to maintain the confidentiality of the terms of agreements entered into with MAFFFL and the suppliers.

The following annexures may be uploaded on your website as per enclosed list. We also request you to kindly ensure confidentiality of our financials which are sensitive to our businesses and request you to upload on your website only the following financial formats submitted by us:

**Approval for ITP Tariff:**

We hereby seek approval of the following tariff for the forth and fifth Tariff year of the First Control Period of 5 years starting from 01.04.2011 to 31.03.2016 under the LIGHT TOUCH REGULATION:

A

0000135

Tariff Year		Aircraft Fuelling	Rate in Rs/KL			
			Aircraft De-fuelling		Aircraft Re-Fuelling De-Fuelled Product into an Aircraft	
			Within 6 hrs	Beyond 6 hrs	Within 6 hrs	Beyond 6 hrs
1st Control Period	Tariff Year-4 (2014-15)	198	200	250	200	250
	Tariff Year-5 (2015-16)	207.9	210	262.5	210	262.5

The rates arrived based on the AERA Guidelines are much higher than the Rates requested for approval.

In view of above submission, we request for kind approval of the Authority at the earliest.

Thanking you & assuring of our best cooperation at all times.

Yours truly

For Bharat Stars Services Pvt Ltd

### Introduction

Bharat Stars Services Private Limited (BSSPL) is a Joint Venture Company of Bharat Petroleum Corporation limited (BPCL)- a Fortune 500 Company and St-Airport Services Pte Ltd (STARS) Singapore was incorporated in September 2007 & started its first commercial operation in May 2008 at the new Bengaluru International Airport when the Greenfield airport started its commercial operations and later in new Terminal III of I.G.I.A Airport, New Delhi since July 2010 after obtaining requisite approvals from the office of Director General of Civil Aviation.

BPCL & STARS own 50 % equity each in the JV Company. Both BPCL & STARS are reputed specialists in the aviation fuel logistics & total supply chain management, including the provision of ITP services with many of years of experience & outstanding track record. BSSPL therefore has inherited full benefits & wealth of Indian & International experiences.

Now BSSPL has been awarded the contract for ITP Operations at CSIA, Mumbai.

### Mumbai Operation

Presently there are two areas of the Airport – Domestic and International. The majority of fuelling of Aircrafts at Domestic is through refuellers and on the International side through the Hydrant system. On an average about 260-280 Domestic flights with volumes of about 1000-1200 KL per day and 160-180 International flights with volumes of about 2800-3000 KL per day are refueled, with a total volume of about 4000 KL per day.

### Background of the activity

The business model at CSIA, Mumbai has introduced the concept of "Open Access System" which has encouraged the competition & optimisation. The "Value Chain of Aviation Fuel Supply has been segmented into:

- a) Aviation Fuel Supplies by Fuel Suppliers
- b) Hydrant Infrastructure Services
- c) Into-Plane Services

Thus the Into-Plane service is a part of Value Chain & was earlier done by fuel suppliers being a part of integrated fuel supply.

The Into-Plane service fee has been arrived by the Airport Operator through a competitive bidding process wherein based on Technical & Commercial evaluation the price discovery for Into-Plane service fee was made. M/s Bharat Stars Services Pvt Ltd was selected through this competitive process by the Airport Operator. Thus in current context there are two "ITP" service providers. Consequent to selection through competitive bidding process, the selected Companies as Into-Plane concessionaire have made / committed investments in line with long term project requirements.

### Detail of Project Cost

As per tender condition we have to purchase existing fleets of lot from the Oil Marketing companies costing Rs. 11.27 Crores. These are old vehicles and we have to replace them and have to comply the norms of regional Transport Regulations and other regulatory authorities. Hence we have to buy new fleets in the future.

### **Hydrant Dispenser**

Hydrant Dispenser is a specially designed and fabricated item having various aviation modules on suitable diesel engine driven chassis meeting regulatory requirements of RTA, CCOE, DGCA, petroleum rules, AAI guidelines etc like permitted axle load, length, width height, permitted safety fittings. The engine is used for propulsion and auxiliary duties complying latest EURO norms.

Dispensers are used for airport having hydrant facility having international standard for handling all type of aircrafts starting from small aircrafts like Beachcraft-20, Falcon-900 to Boeing -777, Airbus380, Antonov 228. This is designed and fabricated in order to meet national and international requirements and safety standards, such as JIG, OISD.

The key features are given below:

1. Brake interlock system:
2. Power take off system: for taking extra energy from engine
3. Metering and digital display with key pad and fuelling database memory and report generation and provision for wireless data transmission.
4. Electrical and pneumatic system for various controls and indication.
5. Flow control system comprising of latest JIG approved Inlet coupler, Aviation fuel pressure control valve, aviation hoses, piping, filter housing, venturi, and Hose end pressure control valve (HEPCV) and delivery couplings.
6. ATF filtration system (fuel monitors), online sampling and product recovery.
7. Fire Extinguishers of different type as per CCOE guidelines
8. Scissor platform lifting mechanism, boom, stabiliser, reel hose winding mechanism suitably designed for single man operation.
9. Provisions for various levers and buttons to handle emergency situation to ensure safe and uninterrupted refuelling.

Confidential – Tariff Plan Submission

0000140

## Refuellers

It is also specially designed and fabricated item having various modules on suitable diesel engine driven chassis meeting regulatory requirements of RTA, CCOE, DGCA, petroleum rules, AAI guidelines etc like permitted axle load, length, width height, permitted safety fittings. The engine is used for propulsion and auxiliary duties complying latest EURO norms.

Refuellers are used for refuelling when no hydrant point is available and also for defuelling activities using its own tank age. This is designed and fabricated in order to meet national and international requirement and safety standards, such as IS9290, Petroleum Rules 2002 and Petroleum Act, IATA-JIG guidelines- latest standard, OISD etc.

The key features are given below:

1. Brake interlock system
2. Power take off system: for taking extra energy from engine
3. Metering and digital display with key pad and fuelling database memory and report generation and provision for wireless data transmission.
4. Fuelling and Defuelling activity with educator mechanism
5. Electrical and pneumatic system for various controls and indication.
6. Flow control system comprising of aviation hoses, piping, filter housing, venturi, Hose end pressure control valve (HEPCV) and delivery couplings.
7. ATF filtration system (fuel monitors), online sampling and product recovery.
8. Fire Extinguishers of different type as per CCOE guidelines
9. Provisions for various levers and buttons to handle emergency situation to ensure safe and uninterrupted refuelling.

As per the Into Plane operation and its Quality requirement, the office should have a proper workshop having critical spares and consumables and maintenance and Quality check tool kits. Few of the key items are listed below:

1. Hose testing machine and supporting parts.
2. Gauge testing equipments

Confidential – Tariff Plan Submission

0000141

*Trusted Partnership*

3. Millipore kit and ASTM chart
4. Other masters like master hydrometers and master thermo meter with sufficient number of hydrometers and thermometers
5. Complete sampling kit for each dispenser and Refuellers and its spares.
6. Critical spares like seals and repair kit for Inlet coupler, AFPCV, Delivery coupling.
7. Air Compressor
8. Car Washing system
9. Various tools.

### **Communication**

Wireless radio communication system with base station and intrinsically safe radio hand sets for smooth operations.

### **Other Capex items:**

As per tender terms, we have to comply with all the regulatory and best practices, so we have to purchase Aviation equipments i.e. hoses, couplings, filters, maintenance equipments etc. We also have to develop ITP Office along with other furniture items and facilities, IT Peripherals and other workshop items for carrying out operations smoothly.

### **Means of Finance**

Estimated cost of project: Rs 265 million

### **Debt:**

- Debt – Equity ratio is 65:35
- Cost of debt: 12% per annum

### **Operating Expenses**

The details of all the head of the operating expenses are given in the enclosed financial statement. Following are key consideration points:

- The organogram structure of CSIA, Mumbai of BSSPL is given separately
- Annual manpower cost escalation: 7.5 % (considering increase of manpower as well as salary enhancement)
- The major Components of Dispensers and Refillers are imported from reputed manufactures globally. The Last two –three year trend is 10% -12% escalation including Exchange Rate Variance.
- In general 5 % cost escalation is taken in consideration for all items / overheads unless there is some precondition of the project like annual rent escalation by MAFFFL is 7.5%
- 6 % revenue share to airport operator is accounted as per concession agreement.
- For the year 2014-15, Three months expense is taken on pro rata basis.
- Rs.50 Lacs pre award cost paid to MAFFFL is charged to Revenue expenses in the First Tariff Year.
